MCS recruitment

Company profile

MCS recruitment is a British employment agency specialising in the placement of skilled technical personnel, on a contract basis, to the engineering sectors in the United Kingdom and the European Community.

With over 25 years experience in the industry, MCS recruitment management is well equipped to provide our clients with the highest possible service. This, together with a sophisticated database of skilled contract personnel who are available and willing to be utilised at short notice, enables us to select the right man for the right job and fulfil our client's requirements in the shortest possible timeframe.

Selection process

Screening and selection is carried out via our Head Office by technical staff who have 'in the field' experience and can therefore select the most suitable candidate based on the criteria and job descriptions supplied by our clients. Many of our contract personnel have previously worked in our service and are a known commodity to us. Our experience of their quality, productivity and personal attitude is first hand valuable knowledge.

The right man for the right job

MCS recruitment co-ordinators visit all prospective clients to gain personal knowledge of their situation and requirements. Only the most suitable candidates are made available, and in the shortest possible timeframe.

We are aware of how important it is that our personnel are punctual and appear ready for work at the pre-arranged work times.

Whilst it is important that our contractors have the capability and experience required by our clients, we strive to ensure that selected candidates also have the correct personal attitude and willingness to work and co-operate with our client's existing workforce.

European Community

Our contract personnel are British residents, in possession of a British passport and National Insurance number.

Upon arrival in the country concerned, MCS recruitment ensures that each contract worker is furnished with the appropriate documentation to conform with international agreements within the European Community.

We take our business responsibilities seriously. Upon request, our tax and legal advisors are able to provide our clients with relevant documentation concerning intra-EC taxation issues.

Contract management

We arrange all formalities for our contract personnel, including travel to and from their contract location, accommodation and registration, where necessary. Care is taken to ensure the well being of our personnel throughout the contract to minimise the effects of any external factors on their productivity and reliability.

Our operations representatives maintain close contact with our clients, and performance of our contract personnel is carefully monitored to ensure maximum productivity and quality are maintained.

Our goal is to provide our clients with a worry-free workforce that can concentrate on what they do best... their work!

A selection of trades and disciplines is listed below:
